## **North Carolina Counties**

### **Update**

**Office of State Budget and Management**  
**Management and Information Services**

**Fall 1987**

STATE OF NORTH CAROLINA  
James G. Martin, Governor

OFFICE OF STATE BUDGET AND MANAGEMENT  
C. C. Cameron  
Executive Assistant to the Governor for Budget  
and Management

The Profile, North Carolina Counties, Update, 1987, has been prepared by the State Data Center, Management and Information Services Section. It presents updated information for the data series included in the seventh edition of Profile, North Carolina Counties published in 1986.

Information contained in this document was contributed by the governmental agencies generating the primary source data. The cooperation of these contributors is gratefully acknowledged.

Comments and suggestions concerning the Profile should be directed to Earlean Strickland, Office of Budget and Management, (919/733-7061).

Additional copies of this publication can be obtained by writing the Librarian, Office of State Budget and Management, 116 West Jones Street, Raleigh, North Carolina, 27603-8005. Cost per copy: \$5.00 plus tax (Tax rate: Wake County - 5%; all other counties in North Carolina - 3%; out of state orders - no tax.) Make checks payable to Office of State Budget and Management; NO COD or invoice billing accepted.

## Preface

The 1987 Update of the Profile, North Carolina Counties presents revised and updated data released since the publication of the 1986 full edition Profile. The Profile assembles in one document many major demographic, economic, and social indicators at the county level which are available on an annual or other periodic basis. Data categories included in this updated edition cover population, labor force and employment, business and industry, agriculture, public assistance, government, education, health, crime and corrections, and highways. These indicators should assist researchers at all levels of government and the private sector in analyzing trend information on the county, multi-county planning-region, metropolitan and non-metropolitan basis, as well as the statewide level. It is our hope that the compilation of this information in one source document will minimize the resources required to analyze state and sub-state conditions and trends.

C. C. Cameron  
Executive Assistant to the Governor  
for Budget and Management

# Introduction

This update of Profile, North Carolina Counties is presented in five major sections: (1) data descriptions and sources, (2) state and county profiles, (3) multi-county planning region and metropolitan statistical area profiles, (4) a graphic summary, and (5) an appendix of revisions to data printed in the 1986 full edition.

In the first section, detailed description of each series and the state or federal source of the data are provided. The descriptions are listed alphabetically by series within broad subject area.

Data for each updated series are presented for all 100 counties and the state in the second section and are separately tallied for 18 multi-county planning regions, nine metropolitan areas, and for metropolitan and nonmetropolitan totals in section three. For many data series, the state value either includes categories not represented in the counties or is an estimate derived by methodology that does not require the state figure to be the same as the sum of counties. Because of this and for ease in calculation of county values as a percentage of state total, a "sum of counties" profile has been included in the state and county profiles section.

The multi-county planning regions, named A - R, were established under consideration of the following factors: (1) the economic and social interrelationships between urban centers and the surrounding areas, (2) existing cooperative programs among counties and municipalities, (3) at least three counties in each region, (4) a population base of at least 100,000 people in each region, and (5) the existence of mountain ranges or rivers that might separate one region from another. The state's planning regions are shown on the map on page 24.

Metropolitan statistical areas (MSA's) are designated by the U. S. Office of Management and Budget. They are defined as generally comparable areas around the nation for studying metropolitan characteristics. The map on page 24 shows the current definitions of the states metropolitan statistical areas. Note that only the North Carolina portion of the Charlotte-Gastonia-Rock Hill MSA is included in each metropolitan data series.

Several data series published in the 1986 Profile, North Carolina Counties have been revised. These series include 1984 Estimated Farm Income and 1984 Employed, Unemployed and Rate of Unemployment. Revised figures are presented in section five, the Appendix.

All maps in the graphic summary section were plotted by Land Resources Information Services.

# Data Descriptions and Sources

## AGRICULTURE

### **Harvested Cropland**

Cropland for the calendar year consists of all land from which crops were harvested including field crops, hay, fruits and vegetables. Acres that have more than one crop (i.e. wheat, soybeans and hay) harvested are counted only once. Data are based on a sample survey conducted by the Crop and Livestock Reporting Service, which prior data were obtained from a state annual farm census. The state figure represents the sum of counties.

NC Department of Agriculture  
Crop and Livestock Reporting Service  
NC Agricultural Statistics

### **Farm Income**

Farm income amounts for the calendar year are estimated gross cash income from the sale of crops, livestock and livestock products, and government payments. Although the federal government frequently revises state level estimates of farm income, the county series is revised only for the year prior to the most recent release. The state series presented in this publication is that agreeing with the county totals. Revised county figures for 1984 are presented in the Appendix. Users may contact the North Carolina Department of Agriculture for more recently revised state figures.

NC Department of Agriculture  
Crop and Livestock Reporting Service  
NC Agricultural Statistics

## BUSINESS AND INDUSTRY

### **Retail Sales**

Retail sales for the fiscal year represent total taxable and non-taxable sales as reported on the Sales and Use Tax Report Forms. The statewide summary includes North Carolina sales by foreign (outside North Carolina) merchants required to collect and remit the tax.

NC Department of Revenue  
Tax Research Division  
"Analysis of State Sales and Use Tax  
Collections and Gross Retail Sales by  
Counties and Business Groups"

## Sales and Use Tax

These amounts represent total gross collections of state sales and use tax for the fiscal year and do not contain any local sales and use tax. The state total includes the 2% use tax collected on motor vehicles, airplanes, and boats and the 3% sales tax on utility services which are not tabulated by county. County sums may differ from the state total due to rounding to the nearest dollar.

NC Department of Revenue  
Tax Research Division  
"Analysis of State Sales and Use Tax  
Collections and Gross Retail Sales by  
Counties and Business Groups"

## CRIME AND CORRECTIONS

### Prison Admissions

These figures reflect the number of new admissions and probation revocations in the state prison system by county of conviction during the calendar year. The state total includes those persons whose county of conviction is not reported. Admissions include a category called "unsentenced".

NC Department of Correction  
State Corrections Statistical Abstract

### Parole Population

These figures reflect the parole population by their county of supervision as of December 31. This count also includes those individuals who have both a probation and a parole sentence, referred to as "duals". Parole population includes only those individuals who are "actively supervised", and these data are derived from a source different from that for the total parole population. Figures for parole population include those individuals on conditional release. The statewide total includes the number of parolees whose county of supervision is not reported and those who absconded; it does not reflect the number of parolees being supervised out of state.

NC Department of Correction  
State Corrections Statistical Abstract

### Probation Population

These figures represent end of year population by county of supervision. They exclude individuals being supervised out of state as well as "duals", those probationers that also have a parole sentence. Statewide totals include individuals for which no county was reported.

NC Department of Correction  
State Corrections Statistical Abstract

### Youth Services Schools Admission

The number of admissions in the calendar year, by county from which the referrals were made, to the five state-supported youth services schools are indicated by these figures. Children under the age of 17 years may be admitted to the schools for committing delinquent offenses. Although a court order is required for commitment of a child, the child is not a convicted criminal. At the age of 18, youths are no longer eligible for detention in the youth services school.

NC Department of Human Resources  
Division of Youth Services

## EDUCATION

### **Public School**

Two data series are presented for public schools, the final enrollment for the school year and the first month average daily membership. The enrollment figures represent the final annual enrollment in the state's public school system (grades K-12) for the nine-month school year. Final annual enrollment is a cumulative total of students enrolled throughout the school year and is not adjusted to reflect withdrawals. Included in these figures are those students who transferred to the public school system from another state or from another North Carolina school district, as well as non-public school students entering the public schools. The first month average daily membership represents the sum of the "number of days in membership" of all students for the first month of the school year divided by the number of school days in that month. In both series, the state figure represents the sum of county data.

NC Department of Public Education  
Division of Public Instruction

### **Community College Enrollment**

The fall quarter headcount enrollment in curriculum and extension courses in the state Community College system is shown by enrollee's county of residence. The statewide total is a summation of county amounts and excludes enrollees from out-of-state.

NC Department of Community Colleges

### **Higher Education Enrollment**

The number of in-state undergraduate students enrolled during the fall term in North Carolina public and private institutions of higher learning is shown here by home county of the student. The many widely available data series on higher education enrollment by location of the institution often tend to over emphasize the enrollment/education level of the home-county of enrollees. This series by home county allows for comparisons among counties with respect to the county's contribution to higher education enrollment in the state. Enrollment refers to the headcount resident-credit enrollment. The resident-credit enrollment includes full-time and part-time students enrolled in courses basic to or creditable to a bachelor's or higher degree. This excludes students in extension, correspondence, adult education, audited courses, short courses, and those enrolled for individual lessons only. Undergraduate includes students who have not completed a full four-year program or its equivalent, and also students in a five-year bachelor's program. Data for the Profile classification include students in private junior colleges but excludes the public community colleges. In-state students are those whose legal residence, as determined by the institution, is North Carolina. Data were excluded for students in military centers. The state total enrollment includes students who did not report a home county.

The University of North Carolina  
General Administration  
Statistical Abstract of Higher  
Education

## GOVERNMENT

### **Registered Voters**

These figures reflect the total number of voter registrations as reported by county boards of election to the State Board of Elections as of October in the reference year.

NC State Board of Elections

### **Property Tax**

This figure represents the total amount of property taxes levied by all local jurisdictions in the county for the fiscal year. The tax is levied on all real and tangible personal property. Personal property includes machinery and equipment, inventories, household property, motor vehicles, etc. There are certain exemptions and exclusions. Preferential treatment is given for certain stored agriculture products. Property taxes are collected by the county and by the component jurisdictions - cities, school districts, and other special districts. County sums differ from the state total due to rounding.

NC Department of Revenue  
Tax Research

## HEALTH

### **Primary Care Physicians**

For purpose of this publication, primary care physicians are defined as active general practices, family practices, internal medicine, pediatrics, obstetrics and gynecology. The doctors included in this count are non-federal non-resident practicing physicians as licensed by the N.C. Board of Medical Examiners in September. The data are provided by the county of the doctor's business address and to their home county if their business address is not known. The state total includes primary care physicians whose county of residence and county of practice are unknown. The specialty OB-GYN includes obstetrics, gynecology, and obstetrics/gynecology. Only the last of these three is considered a primary care practice.

University of North Carolina  
Health Services Research Center  
NC Health Manpower Data Book

### **Hospital Beds**

The number of hospital beds (by design) as of the reference year for general and acute use, pediatrics, eye, ear, nose, and throat, rehabilitation, and long term care are included. The county total excludes beds provided for mental disease, alcoholism addiction, mental retardation, and pulmonary diseases. County totals also exclude state supported hospitals except for North Carolina Memorial Hospital in Orange County, which serves the general public in that area. The statewide total is a summation of county totals plus the state-supported hospitals, and it includes the beds described above which are excluded from the county totals.

NC Department of Human Resources  
Division of Facility Services  
A Complete Listing of Hospital Beds,  
Non-Federal Health Facilities

### **Infant Deaths**

An infant death is defined as death of a live born infant under one year of age. The infant death rate is defined as resident infant deaths per 1,000 resident live births for the calendar year.

NC Department of Human Resources  
Division of Health Services  
State Center for Health Statistics

### **HIGHWAYS**

#### **Highway Mileage**

Figures shown for primary and secondary roads as of December 31 of the reference year include both paved and unpaved mileage. The state primary highway system is composed of all Interstate, U.S., and N.C. numbered highways. The state secondary road system is composed of all other state-maintained roads. A small amount of un-numbered roads such as school driveways, state university campuses, rural fire departments, etc., are not included.

NC Department of Transportation  
Division of Highways  
North Carolina Highway and Road  
Mileage

#### **Auto and Truck Registrations**

Included in the totals for the calendar year are actual registrations for automobiles and trucks by county in which the vehicles were registered. Excluded are registrations for trailers, buses, motorcycles, dealers, transporters, driveway and public-owned passenger vehicles, trucks and trailers. The statewide total is a summation of county amounts.

NC Department of Transportation  
Division of Motor Vehicles

#### **Accidents, Persons Injured, and Persons Killed**

These figures represent the number of reportable accidents in the calendar year. A reportable accident is one which involves a motor vehicle on a trafficway resulting in injury, death, or property damage of \$500 or more. The number of persons injured or killed is determined from the investigating officers' reports which are filed within 24 hours of the accident. The state figure represents the sum of county totals.

NC Department of Transportation  
Division of Motor Vehicles  
North Carolina Traffic Accident Facts

## LABOR FORCE AND EMPLOYMENT

### **By Place of Residence**

Labor Force estimates represent the combined totals of the average annual employed and unemployed persons by place of residence and have been adjusted to remove the effect of multiple job holding and effect of commuting from one county (or planning region) to another. Employment totals include agriculture employment, nonagriculture wage and salary employment, non-agricultural self-employed workers, unpaid family workers, and domestic workers in private households. The rate of unemployment is the ratio of the number of unemployed (not working, but seeking work) to the total number in the civilian labor force. The adjustment of commuters from the labor force total insures that the unemployment rates between areas are comparable and are influenced only by the severity of unemployment. The data are based on the 1980 Census commuting patterns. Revised figures for 1984 are presented in the Appendix. State figures differ significantly from sums of counties due to adjustments made to state totals based on new 1980 benchmarks.

NC Department of Commerce  
Employment Security Commission  
Labor Market Information  
Civilian Labor Force Estimates  
for North Carolina

### **By Place of Work**

Nonagriculture wage and salary employment is an estimate of the average annual number of jobs held by place of work (i.e., the county or region in which the job is held) for all manufacturing and non-manufacturing industries as defined by the Standard Industrial Classification system. Nonagriculture wage and salary employment figures exclude agriculture employment, non-farm self-employed, domestic workers in private households, and unpaid family workers. Statewide totals are estimated independently and may not equal the summation of county data.

Employment Security Commission  
Labor Market Information  
Civilian Labor Force Estimates  
for North Carolina

## POPULATION

### **Total Population**

The population counts presented in this publication are estimates of the July 1, 1985 and July 1, 1986 permanent resident population of the state and each of its counties.

US Department of Commerce  
Bureau of the Census

NC Office of State Budget & Management  
Management and Information Services

#### **Annual Net Migration Rate**

These figures reflect the annual rate of net migration for the period July 1, 1985 to July 1, 1986. In calculating average annual rates, it is assumed that population growth is compounded annually with the rates of natural increase and net migration being additive in any single year.

NC Office of State Budget & Management  
Management and Information Services

#### **Births and Deaths**

Live births and deaths occurring to residents of the area during the calendar year.

NC Department of Human Resources  
State Center for Health Statistics

#### **PUBLIC ASSISTANCE RECIPIENTS**

##### **Aid to Families with Dependent Children (AFDC)**

These figures represent the average monthly number of AFDC recipients for the fiscal year. The AFDC recipients do not include foster-care recipients. The state total was independently estimated.

NC Department of Human Resources  
Division of Social Services  
Planning and Information Services

##### **Supplemental Security Income and Other**

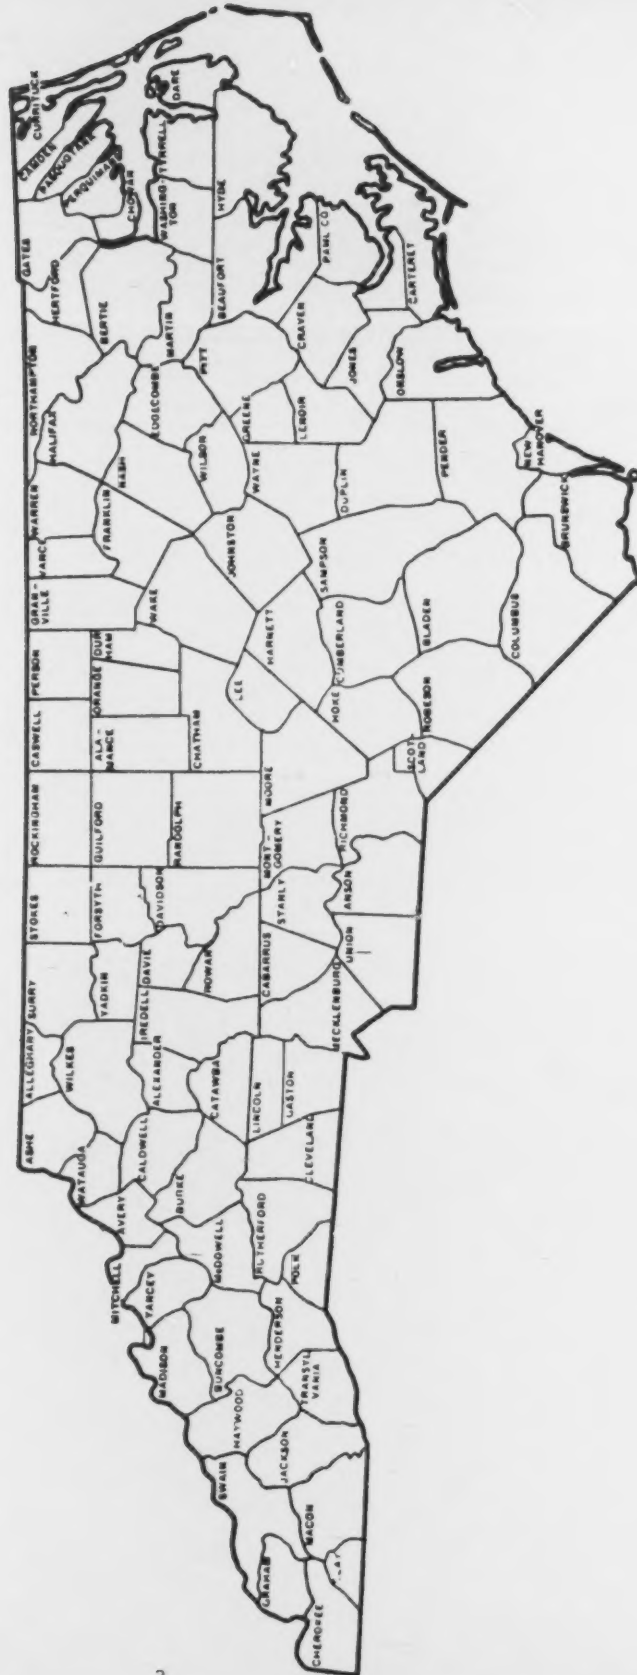

These figures represent the sum of the numbers of aged, disabled, or blind persons receiving income assistance for the fiscal year. The figures for the aged, disabled and blind are obtained by calculating the average number of persons receiving Supplemental Security Income (SSI) in December and June of the fiscal year (in each category respectively), and then adding the average number of persons receiving only state/county special assistance. North Carolina's supplementary program, called State/County Special Assistance, was set up for the dual purpose of complying with federal legislation and compensating for the failure of the federal program to make provisions for the special needs of the aged and disabled; specifically domiciliary care, chore services, needy spouses/essential persons, and certain disabled persons not covered by SSI.
